1 January 2010, h 7

Dear Elisabeth Murchison,  
Science Editors,

regarding the article on Science current issue 1 January 2010: Vol. 327. no. 5961, pp. 84 - 87 DOI: 10.1126/science.1180616: "The Tasmanian Devil Transcriptome Reveals Schwann Cell Origins of a Clonally Transmissible Cancer" Elizabeth P. Murchison and al., I am very delighted with it.

In fact, what I wrote since ever slowly is realizing, although medieval culture of a lot of individuals all around the world, lacking in freedom, who did not answer to me suggesting THEORIES, neither! (Attachment 1).

In the past, I was Member of AAAS for some, indeed too, years, but I recognised I was WRONG, because they never intended to spread Quantum Biophysical Semeiotics among physicians.... and thus I give up happily my Membership, definitely!!!

You, Elizabeth Murchison, and your outstanding co-workers - impossible enterprise for SCIENCE Editors ... - as well as some italian individuals and Politicians - have to try becoming open-minded, farsighted and frei, as NATURE and PLoS Editors (Attachment 2).

Mitochondria impairment plays a central ROLE in patho-physiology of most commeno disorders?  
COMPLIMENTS!

Since 35 years I try unhearded to suggests Congenital Acidotic Enzyme-Metabolic Histangiopathy as the conditio sine qua non, ALSO, of most common and severe today's EPIDEMICS

As a matter of facts, despite the greatest, fascinating, paramount Sceince articles - among thousands of other useless reviews - Diabetes, CVD, Osteoporosis, Cancer, a.s.o., continue to be growing epidemics! Read:

Stagnaro Sergio. Middle Ages of today's Medicine, Overlooking Quantum-Biophysical-Semeiotic Constitutions and Related Inherited Real Risk. <http://sciphu.com> November 4, 2008.

<http://sciphu.com/2008/11/meadle-ages-of-todays-medicine.html>

Once again, I admit my English is poor. However, I am sure you ALL understand WHAT I MEAN!

Greetings  
Sergio Stagnaro

In your considerations on Religion, you speak of CULTURE, MORALITY, "experiments measuring religiosity" (sic!!!), confounding clearly the different dimensions, wherein human spiritual activity reveals itself.

Finally, I advice you, since you may write on Science, to send them a paper on Oncological Terrain and Oncological Real Risk, indicating the efficacious Cancer Primary Prevention, realizable on very large scale in individual enrolled rationally (i.e., involved by Inherited Real Risk of Cancer!).

Good will love you, perhaps, as I appreciate you..... AS SCIENTIST.

Un caro saluto dall'Italia  
Sergio Stagnaro

pkiberst@aaas.org Main adress!

My Dear Science Editors,

reading SCIENCES' articles Diabetes and Death Amount Researches, I'm really surprised to realize that neither YOU nor the Authors - at the beginning of third Millennium- know what posted ALSO in The Lancet website, From my Bibliography in website [www.semeioticabiofisica.it](http://www.semeioticabiofisica.it)

140. Stagnaro Sergio. Newborn-pathological Endoarteriolar Blocking Devices in Diabetic and Dislipidaemic Constitution and Diabetes Primary Prevention. The Lancet. March 06 2007.

<http://www.thelancet.com/journals/lancet/article/PIIS0140673607603316/comments?totalcomments=1>

If we continue to overlook Diabetic "and" Dyslipidaemic Biophysical- Semeiotic Constitutions, Diabetes epidaemia will raise exponentially...

Also Annals Internal Medicine have recently recognized that my original THEORIES on diabetes are worthy (Practical Applications in above-cited website) , highlighting this PROBLEM unsolved untill now:

150. Stagnaro Sergio. New bedside way in Reducing mortality in diabetic men and women. Ann. Int. Med. <http://www.annals.org/cgi/eletters/0000605-200708070-00167v1>.

I invite you frannkly - in the interest of mankind - to become more "humble" , because a proud physician is really not up-dated...and pay some attention to my researches, that are 53 year old!!!!!!  
I cannot write perfectly correct English; my English is poor, uncorrect, but I'm sure that you understand what I mean, IF YOU WILL IT!

Un cordialissimo saluto dall'Italia

Sergio Stagnaro MD

Presentation in [www.semeioticabiofisica.it](http://www.semeioticabiofisica.it)

I am away at a conference and will not be reading email regularly. I will be back in the office on Tuesday, February 19th.

Thanks for your patience.

Paula Kiberstis

Senior Editor, Science

I did'nt receive any further ansie !
